12. What did you like about this course?

Please write legibly and with enough pressure that your words will scan well.

I really appreciated the industry connections. It is hard to know the BS from real innovation so having the speakers was very helpful.

13. What changes, if any, would you suggest if the course is offered again?

Please write legibly and with enough pressure that your words will scan well.

more structure. A lot of people need more help to even contextualize things. Also more structure might make expectation management easier.

14. General Comments:

Please write legibly and with enough pressure that your words will scan well.

I realize this was not exactly how you planned the class but don't get discouraged, people just need a little more structure when they feel uncertain which I think many people were

Please write legibly and with enough pressure that your words will scan well.

I loved how the speakers were somewhat tailored to ~~the~~ what particular groups were working on.

13. What changes, if any, would you suggest if the course is offered again?

Please write legibly and with enough pressure that your words will scan well.

- More organization in the first part of the semester
- more in-depth introduction to Arduino & Github
- time to write during Co-Labs (instead of 1.5 hrs to people talk for 1-2 hrs)

14. General Comments:

Please write legibly and with enough pressure that your words will scan well.

I got alot out of the class. Thanks Dav!

12. What did you like about this course?

Please write legibly and with enough pressure that your words will scan well.

Brood focus and emphasis on enabling us to focus on our passion - great flexibility + support from Dav Clark made this a steep learning opportunity which most of us took advantage of.

13. What changes, if any, would you suggest if the course is offered again?

Please write legibly and with enough pressure that your words will scan well.

More rigid requirement that everyone use the same tech tools to communicate within + across groups, and having a basic skill at the beginning would have smoothed / increased cross-pollination.

14. General Comments:

Please write legibly and with enough pressure that your words will scan well.

Very stimulating overall + great learning experience -
